Career Objective

Enthusiastic Computer Science Engineering graduate with hands-on experience in software development, web technologies, and database systems through academic projects and internships. Proficient in languages like C, Java, and Python, with a keen interest in full-stack development and data analysis. Strong team player with excellent analytical and communication skills, ready to take on real-world tech challenges.

Education

B.E. Computer Science and Engineering, Madras Institute of Technology

- CGPA: 7.94 (as of current semester)

Diploma in Computer Science and Engineering, Muthayammal Polytechnic College

- Overall Percentage: 96.72%

SSLC (10th), The Gugai Higher Secondary School, Salem

Skills

Programming Languages: C++, Java

FrontEnd Development: HTML, CSS, Javascript, React

BackEnd Development: Node.js

DataBase Managemnet: OracleDB, MongoDB

Tools & IDEs: VS Code, Code::Blocks, GitHub

Projects

Learning Path Recommender for Students

- Developed an AI-powered career guidance and learning recommendation system using Machine Learning algorithms such as Random Forest, SVM, Logistic Regression, and XGBoost.
- Built a hybrid dataset by integrating academic performance data with skill-based and interest-based feature engineering to predict suitable career domains for students.
- Implemented personalized skill-gap analysis, learning roadmap generation, and placement-oriented recommendations through a structured recommendation engine and interactive user interface.

Multi Fusion Model for Early Mild Cognitive Detection

- Developed an AI-based Mild Cognitive Impairment (MCI) detection system using CNN Autoencoder MRI analysis and clinical feature fusion for early neurodegenerative risk assessment.
- Implemented brain age prediction, deviation score analysis, and explainable MCI classification with probability-based clinical validation using MRI and patient clinical data.

Inventory Management System

- Built a full-stack web application to manage products, suppliers, stock, and sales reports.
- Enabled CRUD operations, role-based access, and real-time inventory tracking.
- Used MongoDB for database, Node.js + Express for server, and React for frontend UI.

Certifications

- Completed certification in **Computer Hardware and Servicing**
- Participated in **Web Warriors**, a technical event conducted as part of *Prayatna* at MIT
- Participated in **Data Maze**, another tech event in *Prayatna*, Madras Institute of Technology

Coursework

- Database Management Systems
- Data Structures and Algorithms
- Computer Architecture
- Operating system
- Networks and Data Communication
- Machine Learning

Achievements

- Recently we conducted the Fandom Quiz Event in Prayatna'26.
- Solved **50+ programming problems** on LeetCode
- Completed **25+ SQL challenges** on HackerRank
